

Fruit Care Calendar (Adapted from <https://nwfruit.org/fruit-tree-care-calendar/>)

Jan	apply control for peach leaf curl apply three (3) times 3 weeks apart starting in early January until bud break	plant bare root trees, vines, graft scionwood	apply fertilizer & lime	Collect scion wood while fully dormant	Anthracnose Control
Feb	protect peach, apricot, nectarine blossoms from frost	Prune Grape Vines UC Pruning Videos Cane Spur		dormant season pruning & Video	Mason Bee Release
March	Prune/fertilize blueberries	Fertilize raspberries/blackberries	delayed dormant control (Buds begin to swell but before green tips start to show.)		Stone Fruit Control brown rot & shothole
April	repair trellis support systems Fruit trees Grapes	check for tent caterpillars, leaf rollers , use BT			
May	Codling Moth Control Organic pest management	If necessary, fertilize when trees finish blooming Check/install irrigation. Check soil moisture at 6 inches deep. irrigate if needed	aphids, scale, mites scab and mildew control (apple, pear)	apply sticky trap ant barrier (see "Ant Management")	Fruit Thinning (video) apple-pear peaches-
	net cherries, strawberries , and blueberries	Reduce irrigation if tree is growing vigorously (>16-18 inches new growth)			Fertilize blueberries & raspberries
June	Late June: Set out apple maggot traps	Remove fruit infected with disease or insects immediately.		train young trees stake, use spreaders	Fruit Thinning apple-pear
	Codling Moth Control Organic pest management			cut suckers	Fertilize blueberries & raspberries
July			monitor apple maggot control		
August	Cut back June-bearing strawberries after harvest, fertilize			remove laterals on stone fruit	Grape Spray mildew botrytis
Sept.	finish bark grafting trees		summer pruning	support fruited branches	extract mason bee cocoons
Oct.	Apply fungicide for peach leaf curl at 50% leaf fall		prepare ground for spring planting	avoid late pruning	Sanitation-cleanup diseased/dropped fruit & leaves Monitor anthracnose and begin control after harvest
Nov.					
Dec.	begin transplanting nursery trees	collect scionwood		begin dormant pruning
